

2016 EAVS Codebook

Introduction

The 2016 Election Administration and Voting Survey Codebook presents the name of each variable, the question text (if applicable) and a brief description, and the variable type (numeric or string) for each variable in the 2016 dataset. For numeric variables, the frequencies and percentages of missing data are reported, including “Data Not Available” (-999999) and “Not Applicable” (-888888). Additionally, the codes for any string variables that were made numeric are listed.

The codebook for Section B skips over several questions in the 2016 EAVS instrument because respondents were instructed not to respond to those questions in the 2016 Supplementary Instruction Manual. Additionally, question B19-B35 are not included here or in the datasets on the EAC website. Those questions are originally from the Federal Voting Assistance Program’s Post-Election Survey of Local Election Officials, and their data can be found at www.fvap.gov.

Additional information about the 2016 Election Administration and Voting Survey and a copy of the *2016 Election Administration and Voting Survey Comprehensive Report* are available at www.eac.gov.

Total new Same Day registrations: If your State’s laws allowed any voters to register and then to vote on the same day, enter the total number of registration forms received on those days in which it was possible to both register for and vote in the November 2016 general election on the same day. This question includes jurisdictions in States that have formal Election Day Registration or Same Day Registration and those States that have other situations that provide Election Day Registration or Same Day Registration. This question includes jurisdictions in States that permit Election Day Registration for voting for office of President, such as Alaska and Rhode Island.
